

DECODING TEXT TONES

Directions: When we text, people can't hear our voices. Because of this, how we use **CAPITAL LETTERS**, **punctuation (! ? .)**, and **emojis (😊 😡)** changes how a message feels!

Read the identical text messages below. On the blank line, write down the **emotion** or **feeling** you think the sender has (e.g., Happy, Mad, Confused, Annoyed, Excited).
