

Guglielmo Marconi

The Wireless Wonder

Messages Through the Air!

Guglielmo Marconi was an inventor from Italy. He loved to build radios. A radio can send sounds through the air. Marconi used **radio waves** to send messages very far away. He did not use any wires at all! People called this wireless. His radios helped **ships** call for help at sea. Marconi shared his big idea with the whole world.

1 Word Power

radio**waves****ships**

1. Marconi built a to send messages.
2. Radio travel through the air.
3. Marconi's radio helped call for help.

2 Check the things that use radio waves.
