

Vint Cerf

The Internet Helper

Meet Vint!

Vint Cerf helped build the **Internet**. He made **rules** so computers can talk to each other. A message is cut into little pieces. Each piece is called a **packet**. The packets zoom across the Internet. Then they snap back together at the end. Now your message is done! People call Vint a Father of the Internet.

3 Draw It!

Draw a message getting cut into little packets that zoom across the Internet!

★ **FUN FACT:** The Internet does not send your whole message at once. It cuts it into tiny packets, sends them, and puts them back together super fast!
